Versatile, highly motivated, and team-oriented professional with over 12 years of extensive python experience and an individual eager to leverage growth in the field of full stack web development

## Work History

2020-01 -  
2021-08

### Asset Management Analyst

*Epic Real Estate Partners, Austin, TX*

- Developed Python script that extracted demographic data and plotted addresses for 165-property portfolio for investment team to value, resulting in turnaround of one day instead of over two weeks
- Developed Python script to extract/format data from accounting software before generating reports for monthly meetings, reducing time to generate report from three hours to five minutes

2018-09 -  
2020-01

### Investment Analyst

*Embrey Partners, San Antonio, TX*

- Created external marketing materials for new properties by designing detailed, accurate brochures resulting in development of 2,700+ apartments

## Programming Skills

### Back End

- Designed, coded, and deployed personal website REST back end that supports subscribers and email using Flask

### Front End

- Designed and created custom React components for personal website using Bootstrap (customized with Sass), utilizing tabs, drop-downs, and forms that send requests to the backend (see above)

### DevOps

- Deployed personal website to amazon web services (EC-2) and made it publicly available using Route53

## Education

2014-08 -  
2018-08

### Bachelor of Arts: Economics

*University of Texas At Austin - Austin, TX*

- Relevant Coursework: Embedded Systems
